

Siebert - your private label partner
for industrial lubricants

Experts at opening up markets and opportunities

Siebert is an exclusive partner to trade and has been developing coolants and high-performance greases for over 140 years.

We help you to succeed in national and international markets by providing advanced products and a highly customised service package.

Siebert gives you exactly the products that you want to introduce to the market – and can provide them in your containers or in our individual containers, and with customised or neutral labelling.

Our service makes the difference

Reliable products give you the basis you need to succeed. You can also benefit from our excellent service, giving you true added value.

Take our laboratory service: Siebert specialists analyse samples and examine ready-to-used emulsions. If required, we can provide training for your employees.

To win over your customers, you can benefit from our added-value concept “lubrineering”: Our experienced application engineers examine relevant processes and optimise them using a method based on key figures.

Quality

” Made in Germany “

with maximum compatibility for people and the environment.

Carefully tested raw materials are processed in our production facilities, which are among the most modern in Europe. Consistent quality checks throughout the value chain ensure precisely the first class results you expect.

Intelligent concepts, innovative products

More than 20% of employees at Siebert work in research and development. In the Siebert laboratory, they develop innovative formulations for a stable fluid process with the highest environmental compatibility, they carry out fundamental research in tribology and rheology, and they develop application-specific products.

We set standards

- in amine and boric acid-free coolants ST
- in the use of skin and environmentally friendly coolants
- in innovative greases - from small gears through to heavy duty applications

The right products
for optimum
market development

Siebert provides you with exactly the products, which you want to market. Of course, in your or our individual containers, and either with your or neutral labelling.

Water-miscible coolants - maximum performance at low consumption

Coolants from Siebert are characterised by low tool wear, low consumption and long service life. They are suitable for all machining operations and materials, such as aluminium, steel, cast iron, magnesium and ferrous metals.

- Amine and boric acid-free coolants ST
- Conventional coolants
- Semi synthetic coolants
- Fully synthetic coolants
- Ester-based coolants

Neat oils for long tool service lives

For machining and forming operations, Siebert provides powerful machining oils, which ensure process reliability even under high demands. They reduce wear and maintenance costs, are low in consumption due to low oil viscosity, and ensure the surface quality and dimensional accuracy of workpieces.

- Cutting, grinding and drawing oils
- Ester-based coolants
- Grinding oils based on medical white oil
- Multifunctional oils
- Products for minimum quantity lubrication

Greases - constant performance under all conditions

In gears, roller bearings and joints, the highest standards of strength and endurance are provided. Greases from Siebert are, therefore, already considered early on as a design element, and ensure that components bring a lifetime benefit without constant relubrication. There is no labelling requirement on any grease from Siebert.

- Roller and slide bearing greases
- Flow greases
- High-temperature greases
- High-temperature pastes
- Easily biodegradable greases
- Low noise greases
- Our greases for the food industry:
NSF H1 registration, halal and kosher certifications.

Siebert - at a glance

Establishment:	1872
Company headquarters and production sites:	Mönchengladbach-Rheindahlen, Germany
Research & Development:	Own laboratories, cooperation with higher education and research institutes
Products:	Water-miscible coolants Neat oils Machining oils for forming High-performance greases
Services:	Technical support, practical training
Production:	"Made in Germany" quality at our central location in Mönchengladbach, Germany
Certifications:	DIN ISO 9001 DIN ISO 14001 OHSAS 18001
